Data Scientist with bachelors in computer engineering and 2+ years of experience using predictive modeling, data processing, data mining algorithms, Cloud and Technical Knowledge with computer vision, have hands-on experiences in AWS Cloud Architecture and in cloud Infrastructure also hands-on experience leveraging machine learning, models to solve challenging business problems.

SKILLS

Python Programming

Machine Learning

SQL

Power BI

Tableau

Azure

Django

HTML| Css |Bootstrap

WORK EXPERIENCE

Data Engineer | Data Scientist | Developer

Tata Consultancy Services

15/04/2021 - Present

Pune

- I have completed Multiple projects in my 2 years of experience in python machine learning and data Science Part.
- I have developed code for Modules that used in different projects.
- Also I have done the visualization or report generations.

CERTIFICATIONS

MTA: Introduction to Programming Using Python - Microsoft

08/03/2021

Introduction to Python - 365dataScience

08/08/2022

Introduction to Data and Data Science - 365 Data Science

PROJECTS

TotalEnergies SE

10/04/2021 - 15/10/2021

Understand the requirements and formulate problem statements.

Acquisition and analysis of data.

- Analyze data sets to provide insights to experts from various domains.
- Building statistical modeling and applying various machine learning techniques.
- Use of analytics for automation and enhancement in the field of aerospace industry e.g. - predictive maintenance using machine Learning.

Holcim

13/10/2021 - 10/09/2022

- After analyzing datasets from various Sensors built predictive model for high impact Machine components.
- This model has not only consistently predicted the failure of components, but also helped reduce the downtime of Machine in the field.

Proctor And Gamble

18/09/2022 - Present

- Creating Python script for Automation of Configuration CDW and Plant Applications Server and testing Part.
